

PSIAMS

SYSTEMS

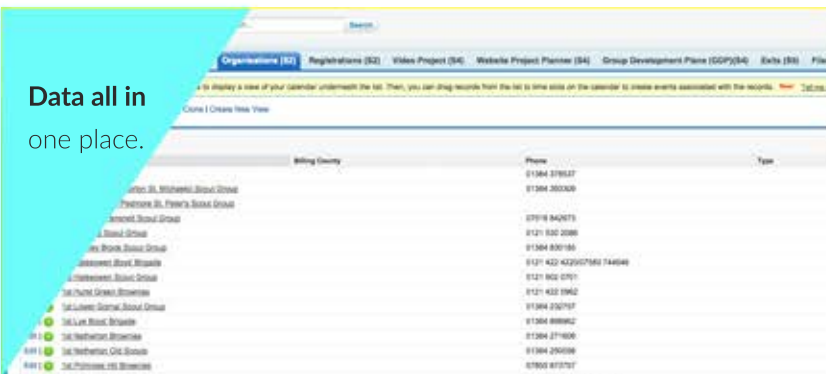

PSIAMS Benefits Guide:

- Client case management - Triage, track and manage client interaction, develop your own processes and timeframes
- Cloud-based - Enables your staff to work remotely and endless collection of your data
- Centralised data - One database for all your needs. Eliminates duplication of data and saves time.
- Fully integrated modules - Makes information about clients, projects, events etc easy to track.

- User access levels - Ability to allow users (staff /volunteers /delivery partners) to only access the modules they need
- Export data - Manipulate and use your data any way that you want
- Organise contacts into types and groups - Facilitates targeted marketing and communications
- Record and track project work - Improve efficiency, monitor impact, document outcomes
- Record and track client/beneficiary activity - Monitor impact and document outcomes
- Performance information and reporting - Ability to monitor and demonstrate impact, identify areas for improvement, helps stay focused on mission.

- CCG funded and championed - Recognised by the commissioner, collecting the evidence they need
- Internal chat and forums - Communicate with colleagues and partners using a secure internal network, join groups to promotes good communication and partnership working
- Consortia friendly infrastructure - Integrated IT infrastructure for effective project management involving multiple partners

Quote: "We've worked with many IT provides in the past and working with the PSIAMS team has been the first time we've had a positive experience - their approach is unique!"

Suzanne Callen, CEO Summit House Support

PSIAMS Systems: "Empowering organisations to help them maximise the efficiency and impact of their work, through focused Data Outcomes Management"
