

PSIAMS

SYSTEMS

Our PSIAMS CRM (Customer Relationship Management) / MIS (Management Information System) can provide you with data better intelligence, help you shape your future strategy and demonstrate your impact / Return on Investment, but how do you know if it's time to consider the move to PSIAMS?

One system for all.

10 Questions you should ask before thinking about adopting any new CRM/MIS Solution:

1. Do you store in multiple, unconnected systems/places?
2. Are you clear on what's happening across your organisation?
3. Do you find it hard to communicate effectively, either internally or externally..or both?
4. Do you find it time consuming or challenging to report back to key stakeholders?
5. Do you worry about data retention and retrieval?
6. Do you find accessing data on the move difficult?
7. Do you feel your clients can tell you they get a good, bespoke experience from you?
8. Do you find getting data for planning ahead difficult?
9. Are your processes driven by paper and staff remembering what to do?
10. Do your competitor or contemporaries appear to be ahead of the game?

If you've answered yes to some of these questions above then give us a call for a chat...and don't forget that we can probably provide you with a system easier, quicker and cheaper than you think:

- Low set-up costs.
- No hardware
- No software
- Mobile
- Support and upgrades
- Automatic upgrades: 3 times a year.
- Customisable solutions
- Future proof...ready to grow when you need to.

Data all in one place.

Quote: "In our first two meetings with the PSIAMS team we had realised how we could make changes to improve the way we work."

-Martin Hogg, CEO, Citizen Coaching

PSIAMS Systems: "Empowering organisations to help them maximise the efficiency and impact of their work, through focused Data Outcomes Management"
